**SEMBWASTE'S AUSTRALIAN ASSOCIATE SECURES A\$151 MILLION
CONTRACT FOR WASTE COLLECTION SERVICES**

Singapore, February 14, 2002 - SembCorp Waste Management's (SembWaste) Australian associate, SITA Environmental Solutions (SITA Aus. formerly known as Pacific Waste Management) has been awarded Australia's single biggest waste contract worth A\$151 million (approximately S\$142 million) to provide domestic waste and recyclables collection services for Brisbane, Australia. Awarded by the Brisbane City Council, the contract is for a period of eight years starting from July 2002.

SembWaste has a strategic 40 per cent stake in SITA Aus. with the rest held by SITA France, one of the largest environmental solutions companies in the world. SITA Aus. is Australia's second largest waste management services provider with operations in Sydney, Perth, Canberra, Adelaide and Melbourne.

In winning this contract, SITA Aus. will be operating the world's first "single pass" garbage and recycling trucks in Brisbane. A leading edge innovation, the trucks feature separate compartments for waste and recyclables such that only one truck will be required to collect both types of bins. Fitted with low emission engines, they are more environmentally efficient than single-use vehicles. In all, SITA Aus. will be bringing 71 of these vehicles into circulation.

Apart from new world class technology, environmental performance, cost, residential amenity and demonstrated ability were reasons for securing the contract for SITA Aus.

The environmental engineering arm of SembCorp Industries, SembWaste is the largest environmental services company in Singapore, offering total integrated waste management solutions including collection and post-collection of waste, recycling, waste-to-energy incineration, industrial and street cleansing, and environmental engineering and consultancy.
